

Logical thinking

- Don't go to conclusions with shallow perspective.
 - Use time to get the full picture.
 - Different point of view
 - You can distort things through aggerating certain points.
 - Things look different from different POV's.
 - If everyone believes something most people will believe it without critical thinking.
 - Thinking that all types of worldviews are correct so that everyone is correct is a logical error.
 - A conclusion of a certain group based on a few individuals is a logical error. (is also called racism)
 - Just because its new does not mean its correct.
 - Though if it is a scientific advancement should take, don't think everything is false.
 - Thinking that if a large group of people think its correct it is correct.
-

Interpreting

- Words do not have only one meaning they are altered depending on where in the sentence they are used.
- You are required look at the context on top and below the word or series of words to fully interpret what it means.

Correlating

- Correlate what you have discovered with other biblical truths you know.
